The 7th annual Interphex Puerto Rico Conference & Exhibition, the island's top industrial event for the life sciences industry, will take place March 4-5 at the Puerto Rico Convention Center, organizers announced Tuesday.

Produced by Reed Exhibitions, Interphex Puerto Rico serves the needs of the pharmaceutical, biopharmaceutical and medical device manufacturing professionals within Puerto Rico as well as the greater Caribbean region. The event gives industry executives a source of education, technology, products, solutions and networking.

The 2010 event will showcase a host of new additions and features including more than 250 exhibitors — of which more than 50 are exhibiting for the first time — an enhanced educational program, a focus on

sustainable solutions and automation technologies, and a co-location with the new Latin American Supply Chain Expo, produced by the Multi Sectorial Alliance. Continuing education units are being provided by the School of Engineers and Land Surveyors. In addition, Rockwell Automation will present two days of comprehensive automation training for technicians and technical personnel. Interphex Puerto Rico is one of series of Interphex global events that also take place in the U.S. mainland, China, Japan, Singapore, and Mexico.
