**Tegrant Corporation Alloyd Brands launches enhanced medical blister packaging machine**

DEKALB, ILLINOIS – (May 21, 2009) – Tegrant Corporation, Alloyd Brands announces its newest package sealing machine: the Aergo® 2 Max with Power Shuttle option. This is the premiere packaging machine for the medical market featuring increased productivity, reliability, ISO class 5 clean room compliancy and operator safety enhancements. With a 20" x 28" available sealing area and increased sealing strength, this machine is perfect for large medical device or over-the-counter club store packages. The Aergo 2 Max operates with an increased level of safety, comfort, and reliability.

The new Aergo 2 Max sealing machine was unveiled at the EastPack 2009 show in New York City. A demonstration of this machine – with the added Power Shuttle and ISO Class 5 components options – sealing medical-style trays with Tyvek® lidding was featured, highlighting the machine's safety and operator versatility.

Alloyd Brands is a Strategic Business Unit of Tegrant Corporation. Based in DeKalb, Illinois, Alloyd Brands is a leading manufacturer and award-winning designer of high visibility packaging and blister packaging machines for the retail and medical markets. Its portfolio of products and services includes blister cards, blisters, insert cards, clamshells, folding cartons, insert trays, packaging design, prototyping, tooling and a full line of sealing machinery.
